

**PRODUCTS & SYSTEM**

All of our design activity is built on DNV ISO 9001:2008 standard

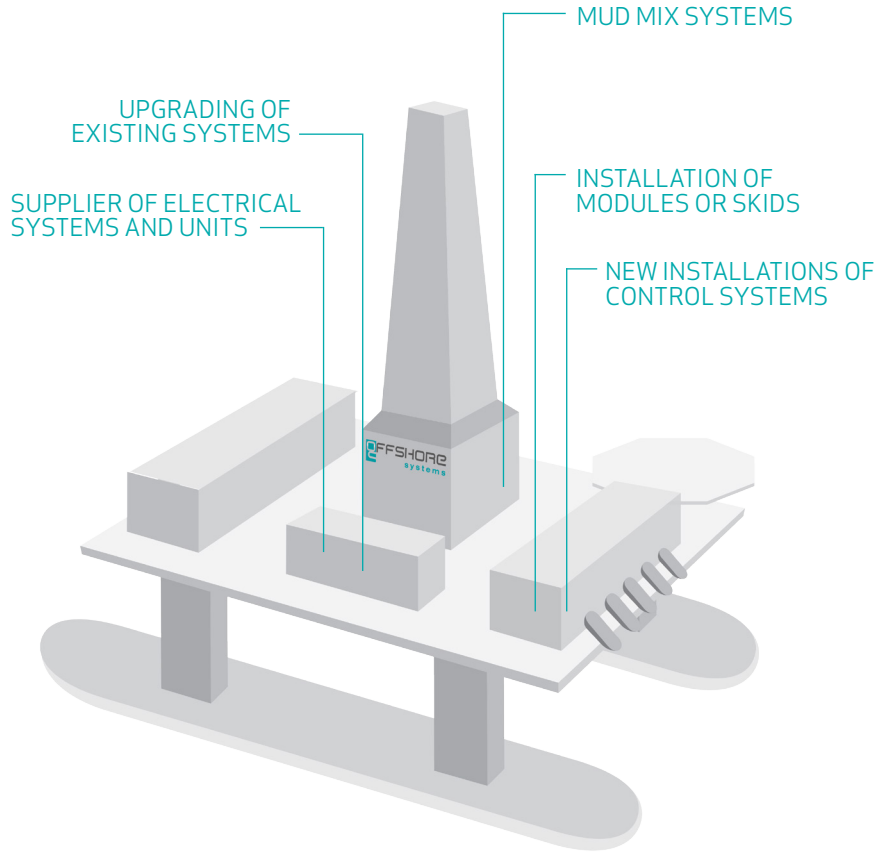

**TYPICAL SERVICES**

- Design and delivery of Ex enclosures.
- Z-015 checkout of 3rd party equipment
- Fault finding
- Fire & gas systems
- ESD/PSD systems
- PLC systems
- Mud mix systems
- Control rooms
- Ex maintenance
- Instrumentation systems
- Power distributions
- HVAC control systems
- HMI systems

**SUPPLIER OF ELECTRICAL SYSTEMS TO THE OIL & GAS**

Offshore Systems performs different types of assignment for the oil & gas industry. Ranging from small studies, Z-015 checkouts, new installations of control systems, installation of modules or skids, upgrading of existing systems, replacing of old systems/units and delivery of fully electrical/automation systems such as ESD systems or mud mixing units.

As a supplier of electrical systems and units to the oil & gas industry we are well familiar with regulations and documentation requirements that apply to this industry.

**INSTALLATION**

A specialized industry demands specialized people, and Offshore Systems have skilled technicians readily available for installation and commissioning of supplied equipment, as well as knowledgeable and experienced service company equipment specialists 24/7.

**WORLDWIDE  
OFFSHORE & ONSHORE**

The offshore oil and gas industry is anything but local. Neither are we. Through our own staff of professionals and reliable partners, we offer solid support services online and on site at any location worldwide.

**MANAGEMENT**

Offshore Systems is qualified in accordance with the Achilles Joint Qualification System. All our management systems are in place, and we are fully certified in accordance with the EN-ISO 9001:2008 standard.

**APPROVED BY  
DSB FOR DESIGN,  
INSTALLATION AND  
MAINTENANCE OF:**
